Peter Scott says he saw an FBI report that Jack Ruby was an UnAmerican Committee informant when Scott was in Washington. His source is an unnamed respected correspondent I take to be Sculz, who he did see. J.David Truby has what amounts to a denail from Calrence Kelley, who says that what he was supplied makes it impossible to check the main or subject FBI files but that a check under "the name of Jack Rubenstein of Chicago was conducted, which did not disclose the document." Truby wrotes he will call me in several days. This will give me an opportunity to learn exactly what document he sent Kelley. HW 8/19/74
